

COMMUNITY MEETING

If you are concerned about, opposed to, or simply interested in discussing the massive housing project of up to 450 units being proposed to replace the 200 year old Stone Ridge Orchard, please come to a meeting:

SATURDAY, AUGUST 25, 2007
10:00 a.m.- Noon
Marbletown Community Center
Route 209, Stone Ridge

This will be an opportunity to express concerns, opposition or any point of view in a forum not controlled by those with a financial interest in the development.

Issues to be discussed will include:

- Community concerns about the impact of the housing project on the environment, traffic volume, diversion of water resources, essential services, and the rural character of our community
- Zoning changes and other decisions that must be made by our town officials before a project of this scale could even be considered
- The viability of the orchard as a productive, sustainable farm
- Actions to be taken to express opposition and stop the proposed development

There will be ample time for public comment on any issue relating to the proposed development that may be of concern to the community.
